I. INTRODUCTION

All the claims being pursued by Plaintiffs Carlos Victorino and Adam Tavitian are based on the notion that there is an unspecified “defect” in the clutch system in the manual-transmissions used in model-years 2013 and 2014 Dodge Dart vehicles. But, there is no evidence of any such defect. Nor is there any evidence that a defect caused the need for repairs to the clutch system in Victorino’s vehicle (after 34,351 miles), or the need for repairs to the clutch system in Tavitian’s vehicle (after 42,075 and 62,043 miles). Indeed, the third-party dealership technicians who examined Plaintiffs’ vehicles for clutch problems concluded that (different) parts in the clutch systems had simply “*worn out*” from “*normal wear and tear.*” (UF, Nos. 6-8, 13, 24-25, 28, 33). The mere fact that a vehicle *wear component* needs a repair after tens of thousands of miles of usage (and after the warranty period expired) is *not* evidence of any defect, and supports no claim.

Because the evidence does not support the critical defect and causation elements that Plaintiffs must prove, summary judgment should be entered in favor of Defendant FCA US LLC, and against Plaintiffs Carlos Victorino and Adam Tavitian.

II. BACKGROUND & RELEVANT FACTS

A. The “Defect” Alleged By Plaintiffs In The Complaint.

In their Complaint, Plaintiffs allege, “on information and belief,” that there is a “defect” in their Dodge Dart vehicles which they describe as a “design flaw in the clutch master cylinder wherein the internal and external seals are ineffective in preventing debris from contaminating and prematurely wearing the seals, resulting in the deprivation of hydraulic fluid.” *See* Class Action Complaint, Dkt. No. 1 (“Comp.”), ¶¶ 4, 51. Plaintiffs further allege “on information and belief” that this “defect” is “exacerbated by Defendant’s use of a plastic clutch master cylinder, which is prone to corrosion.” *Id.* Plaintiffs also describe a wide variety of clutch-

1 related issues which they claim, “on information and belief,” might result from the
2 vaguely identified “defect,” including: “collateral damage to the vehicle’s clutch
3 slave cylinder and release bearing, clutch disc, pressure plate, and flywheel”;
4 “inability to shift gears or maneuver the clutch pedal”; “difficulty bringing ...
5 vehicles to a stop or to park,” and in “control[ing] the vehicle’s speed, acceleration
6 and deceleration”; “premature wear to the Manual Transmission and its related
7 components”; and “premature clutch system or transmission failure.” *Id.* at ¶¶ 4,
8 11-12, 51, 54. The “defect” purportedly necessitates “expensive repairs, including
9 replacements of the clutch master cylinder and reservoir hose, clutch slave cylinder
10 and release bearing, clutch disc and pressure plate, and flywheel.” *Id.*¹

11 **B. Victorino’s Experience With His 2014 Dodge Dart.**

12 Plaintiff Carlos Victorino purchased a model-year 2014 manual-transmission
13 Dodge Dart vehicle on March 22, 2014. (UF, No. 1). His vehicle was covered by
14 a 12-month/12,000 mile Basic Limited Warranty for “clutch discs or modular
15

16 ¹As Plaintiffs have acknowledged, this case is a “spin off” from *Hardt v.*
17 *Chrysler Group LLC*, Case No. 8:14-cv-01375 (C.D. Cal.) (“*Hardt*”). See Dkt.
18 No. 18, p. 4 n.1. In *Hardt*, the same attorneys representing Plaintiffs here filed a
19 putative class action making virtually the same allegations as those made here, and
20 then claimed and collected a hefty catalyst attorney fee award when they declared
21 that a voluntary service action implemented by FCA US cured the clutch “defect”
22 in the Dodge Dart vehicles owned by the putative class members, ***including those***
23 ***owned by Plaintiffs Victorino and Tavitian.*** The customer service action – which
24 included reimbursements for past repairs and an extended warranty period for free
25 replacements of the reservoir hose and clutch master cylinder – was implemented
26 by FCA US to address an issue involving seal-swelling from the use of a particular
27 kind of leaching plasticizer in a reservoir hose in the clutch system. See Comp.
28 ¶¶ 18, 65. Having collected an excessive attorney fee based on an argument that
they prompted FCA US to ***fix*** the clutch problems in the vehicles owned by all
putative class members (including those owned by Victorino and Tavitian),
Plaintiffs’ counsel now brings this case based on the notion that the customer
service action did not really fix the vehicles (as they contended when they argued
for a catalyst fee). These counsel now assert that is a “different” “defect” that will
not be addressed by replacing the reservoir hose and master cylinder, *i.e.*, a
“defect” that does not involve seal swelling due to leaching plasticizer. *Id.*

1 clutch assembly.” (UF, No. 2). A Powertrain Limited Warranty provided for the
2 vehicle specifically indicted that “MANUAL TRANSMISSION CLUTCH PARTS
3 ARE NOT COVERED AT ANY TIME.” (UF, No. 3).

4 After driving his vehicle for almost two years, on or around January 10,
5 2016, Victorino “noticed that the gears were not properly ‘catching’ when
6 attempting to shift.” (UF, No. 4). Two days later, Victorino took his vehicle to a
7 local dealership, San Diego Chrysler Dodge Jeep Ram, for service. (UF, No. 5).
8 Victorino’s vehicle showed 34,351 miles on its odometer when he brought it to the
9 dealership. (UF, No. 6).

10 Technicians at the dealership examined Victorino’s vehicle, and concluded
11 that the clutch was simply “**worn out**,” and that the clutch, slave cylinder, and
12 flywheel were all “overheated and warped.” (UF, No. 7). The technicians
13 concluded that this resulted from “**normal wear and tear**”; there was no “defect”
14 noted, nor any “contamination” or degraded “seals.” (UF, No. 8). The technicians
15 did not identify any problem with, or damage to, the clutch master cylinder in
16 Victorino’s vehicle. (UF, No. 9). Nor did the clutch master cylinder in Victorino’s
17 vehicle experience any issue that required a repair or replacement at this (or any
18 other) time. (UF, No. 10; *see also* UF, No. 14-15).

19 The flywheel in Victorino’s vehicle was replaced at no charge. (UF, No.
20 11). The remaining repairs to the clutch system cost Victorino \$1,165.31. (UF,
21 No. 12). Victorino sent a claim to FCA US seeking reimbursement of the costs for
22 the clutch repair, claiming it should be covered by a January 2016 voluntary
23 customer service action, *i.e.*, he claimed that the repair was necessitated due to
24 leaching plasticizer from a reservoir hose. This request was denied because “[t]he
25 **reason for the repair was the clutch was worn out**,” and not due to an issue with
26 the seals or reservoir hose. (UF, No. 13).

1 Since Victorino's vehicle was repaired by San Diego Chrysler Dodge Jeep
2 Ram in January 2016, he has made no further complaints about the clutch in it.
3 (UF, No. 16).

4 In discovery, FCA US issued a request for production to Victorino seeking
5 all component parts removed from his vehicle, *e.g.*, the clutch parts removed in
6 January 2016. (UF, No. 17). Victorino admitted that he does not have the clutch
7 components removed from his vehicle in January 2016, in that he said that "after a
8 diligent search," the only removed vehicle component he can now produce is an
9 "air intake" (a component having nothing to do with this case). (UF, No. 18).

10 **C. Tavitian's Experience With His 2013 Dodge Dart.**

11 Plaintiff Adam Tavitian purchased a model-year 2013 manual-transmission
12 Dodge Dart vehicle on November 30, 2012. (UF, No. 20). His vehicle was
13 covered by a 12-month/12,000 mile Basic Limited Warranty for "clutch discs or
14 modular clutch assembly." (UF, No. 21). The Powertrain Limited Warranty
15 provided for his vehicle specifically stated that "MANUAL TRANSMISSION
16 CLUTCH PARTS ARE NOT COVERED AT ANY TIME." (UF, No. 22). Per
17 standard practice in the industry, the warranties provided for Tavitian's vehicle
18 stated that "disconnecting, tampering with, or altering the odometer will void your
19 warranties."² (UF, No. 23).

20 On or about July 7, 2014, Tavitian took his vehicle to a local dealership,
21 Rydell Chrysler Dodge Jeep Ram, complaining that his vehicle's clutch was
22 sticking and failing at times to shift gears. (UF, No. 24). The clutch master
23 cylinder – a vehicle component that was covered by FCA US's extended warranty
24 because failure of it could be caused by the "different" "defect" not at issue in this

25 ²Odometer tampering is a crime. *See, e.g.*, 49 U.S.C. §§ 32701 *et seq.*
26 (Federal Odometer Act prohibiting "tampering with motor vehicle odometers");
27 Cal. Veh. Code § 28051 ("It is unlawful for any person to disconnect, turn back,
28 advance, or reset the odometer of any motor vehicle with the intent to alter the
number of miles indicated on the odometer gauge").

1 case, *i.e.*, leaching plasticizer in the reservoir hose – was replaced. (UF, No. 25).
2 While Tavitian’s vehicle was at the dealership, it was discovered that he had
3 removed his vehicle’s odometer and replaced it with a newer odometer that
4 displayed 28,697 fewer miles than the original odometer displayed. (UF, No. 26).
5 The actual mileage on the vehicle at the time of the repair was 42,075 miles. (UF,
6 No. 27).

7 Tavitian paid \$298.33 for the July 2014 repair, but subsequently applied for
8 reimbursement of that cost claiming the repair was covered by FCA US’s
9 January 2016 voluntary customer service action, *i.e.*, he effectively claimed that the
10 repair was needed due to leaching plasticizer from a reservoir hose. (UF, Nos. 28,
11 29). Tavitian’s application for reimbursement was denied ***only on the basis of***
12 ***odometer tampering***, not because the repair was outside the extended warranty
13 (without the odometer tampering the repair would have been covered as one
14 possibly needed due to leaching plasticizer from a reservoir hose). (UF, No. 29).

15 On July 11, 2016, after this case was filed, Tavitian brought his vehicle to
16 another local dealership, Glendale Dodge Chrysler Jeep, complaining of problems
17 with the vehicle’s clutch. (UF, No. 30). Tavitian’s odometer showed “33,346”
18 miles when brought to the dealership, but the actual mileage was 62,043 miles.
19 (UF, No. 31). FCA US’s consulting expert attempted to inspect the vehicle for
20 purposes of this litigation before the repair was done and found that he could not
21 form opinions about the cause of the current issue without replacement of the
22 clutch master cylinder and reservoir hose, and thus these replacements were made
23 at no charge to Tavitian. (UF, No. 32). Once the vehicle was repaired to the extent
24 necessary to complete the inspection, it was determined that the actual problem
25 with Tavitian’s vehicle was a throw out bearing, and that the clutch ***disc*** was
26 simply ***“worn out,”*** showed signs of overheating, and needed to be replaced. (UF,
27 Nos. 33-34). Tavitian declined repairs at the dealership, but three months later (in
28 October 2016) he had the clutch repaired by J & E Auto Services, Inc. (UF, No.

1 35).

2 In discovery, FCA US requested that Tavitian produce all component parts
3 removed from his vehicle, including the clutch parts replaced both before and after
4 he filed this lawsuit. (UF, No. 36). Tavitian admitted that he does not have any
5 clutch components when he stated that, “after a diligent search,” the only
6 component he can locate is the “instrument panel” he removed from his vehicle (a
7 component which has nothing to do with the alleged clutch “defect” at issue in this
8 case). (UF, No. 37).

9 **D. Plaintiffs’ Claims In This Case.**

10 Plaintiffs plead five causes of action: (1) violation of California’s
11 Consumers Legal Remedies Act, California Civil Code § 1750, *et seq.*;
12 (2) violation of California Business & Professions Code § 17200, *et seq.*;
13 (3) Breach of Implied Warranty under the Song-Beverly Consumer Warranty Act,
14 California Civil Code §§ 1791.1, 1792, *et seq.*; (4) Breach of Implied Warranty
15 under the Magnuson-Moss Warranty Act, 15 U.S.C. § 2303, *et seq.*; and (5) Unjust
16 Enrichment. *See* Comp. ¶¶ 81-139.

17 **III. ARGUMENT**

18 **A. The Summary Judgment Standard: Plaintiffs Have The Burden To**
19 **Prove That A Defect Exists; It Is Not FCA US’s Burden To Prove That**
20 **A Defect Does Not Exist.**

21 Under Rule 56(c) of the Federal Rules of Civil Procedure summary
22 judgment must be entered “against a party who fails to make a showing sufficient
23 to establish the existence of an element essential to the party’s case, and on which
24 the party will bear the burden of proof at trial.” *Celotex Corp. v. Catrett*, 477 U.S.
25 317, 322-23 (1986). The moving party bears the initial burden of establishing the
26 absence of a genuine issue of material fact. *Id.* at 323-24. “That burden may be
27 met by ‘showing’ – that is, pointing out to the district court – that there is an
28 absence of evidence to support the nonmoving party’s case.” *Fairbank v.*

1 *Wunderman Cato Johnson*, 212 F.3d 528, 531 (9th Cir. 2000) (citation omitted). In
2 other words, “[a] defendant who moves for summary judgment ... need not
3 produce evidence negating elements of a claim” on which the plaintiff bears the
4 burden of proof. *Estate of Tucker ex rel. Tucker v. Interscope Records, Inc.*, 515
5 F.3d 1019, 1029 (9th Cir. 2008) (citations omitted).

6 Once the moving party has met its initial burden, the nonmoving party must
7 “produce evidence that sets forth specific facts showing that there is a genuine
8 issue for trial.” *Id.* at 1030 (citations omitted). To prevent summary judgment, the
9 “mere existence of a scintilla of evidence in support of the plaintiff’s position will
10 be insufficient; there must be evidence on which the jury could reasonably find for
11 the plaintiff.” *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 252 (1986).
12 Furthermore, “[d]isputes over irrelevant or unnecessary facts will not preclude a
13 grant of summary judgment.” *T.W. Elec. Serv., Inc. v. Pac. Elec. Contractors*
14 *Ass’n*, 809 F.2d 626, 630 (9th Cir. 1987).

15 Applying these established principles, summary judgment is required here.

16 **B. There Is No Competent Evidence Of Any “Defect”.**

17 Plaintiffs’ claims are all premised on the notion that there is a “design flaw
18 in the clutch master cylinder” which allows “debris” to contaminate “internal and
19 external seals,” and they were harmed “as a result of” this purported “defect” due
20 to FCA US’s failure to disclose it. *See, e.g.*, Comp. ¶¶ 4, 51, 85, 87-88, 90-91, 99,
21 102-06, 118-20, 128, 136-37. Thus, a threshold issue is whether the defect alleged
22 even exists. If not, Plaintiffs have no claims. *See, e.g., In re Toyota Motor Corp.*
23 *Hybrid Brake Mktg., Sales Prac. & Prod. Liab. Litig.*, 2013 WL 4017134 at *5
24 (C.D. Cal. 2013) (“the critical issue in this case is whether there is a manifest
25 defect in the ABS that caused an actual injury to [plaintiff]”); *Christensen v.*
26 *Synthes USA*, 2013 WL 1899094 at *4 (C.D.Cal. 2013) (granting summary
27 judgment on fraud, UCL, and unjust enrichment claims where there was no
28 competent evidence of an actual defect); *In re Firearm Cases*, 126 Cal.App.4th

1 959, 982 (2005) (affirming summary judgment on a claim under the UCL where
2 there was no competent evidence that product was defective).

3 ***There simply is no competent evidence that the “defect” described by***
4 ***Plaintiffs actually exists.*** All that the available evidence shows is that Victorino
5 and Tavitian drove their vehicles for almost two years (and 34,351 and 42,075
6 miles, respectively) before experiencing a clutch problem. (UF, Nos. 6, 27). But,
7 it is common knowledge that clutch systems in manual-transmission vehicles can
8 wear out and need repairs even if no defect exists. This is because even the best
9 clutch system can require repairs after relatively few miles for many reasons,
10 among them being driving habits, aggressive use of the clutch, and other misuse.
11 *See, e.g.,* <https://www.yourmechanic.com/article/how-long-does-a-clutch-last>.

12 It is beyond dispute that simply because Plaintiffs’ vehicles eventually
13 required clutch repairs is ***not*** evidence of the existence of a “design flaw” in the
14 clutch master cylinder which causes “contamination” of “internal and external
15 seals.” Indeed, courts have long recognized the simple truth that “[a]ll
16 [automobile] parts will wear out sooner or later.” *Daugherty v. Am. Honda Motor*
17 *Co.*, 144 Cal. App. 4th 824, 830-39 (Cal. App. 2006); *see also Indiana Nat. Bank of*
18 *Indianapolis v. De Laval Separator Co.*, 389 F.2d 674, 678 (7th Cir. 1968) (a
19 product cannot be assumed to be defective “simply because it [will] wear out”).

20 The failure of a product to last forever is not a defect because to hold
21 otherwise would mean that “a manufacturer would no longer be able to issue
22 limited warranties, and product defect litigation would become as widespread as
23 manufacturing itself.” *Williams v. Yamaha Motor Co.*, 851 F.3d 1015 (9th Cir.
24 2017) (internal quotation omitted); *see also Clemens v. DaimlerChrysler Corp.*,
25 534 F.3d 1017, 1023 (9th Cir. 2008) (“Every manufactured item is defective at the
26 time of sale in the sense that it will not last forever.”); *Daugherty*, 144 Cal. App.
27 4th at 830-39 (affirming dismissal of express warranty, unfair competition, and
28 CLRA claims based on an alleged defect that reduced the life span of the vehicle’s

1 engine, but did not cause the automobile to malfunction during the warranty
2 period).

3 When asked directly what *facts* and *evidence* they have to support their
4 claim that a “defect” exists, Plaintiffs responded with *no facts* and *no evidence*;
5 instead, they offered a circular *argument* that begged the actual question, claiming
6 a “defect” exists simply because “the clutch needed repeated repairs. Those repairs
7 were premature and caused by a defect in the Manual Transmission.” (UF, Nos.
8 19, 38). This argument cannot substitute for *evidence* of a defect because, under
9 *Daugherty* and *Clemens*, the fact that a vehicle component wore out or that repairs
10 were needed long after the warranty expired is not evidence of any defect.

11 Simply put, there is no evidence of the existence of a “defect” in the nature
12 of a “design flaw” in the clutch master cylinder which causes “contamination” of
13 “internal and external seals.” Accordingly, summary judgment should be entered
14 in FCA US’s favor on all claims.

15 **C. The Evidence Proves That It Was Not A “Defect” That Caused The**
16 **Clutch Problems In Plaintiffs’ Vehicles.**

17 Causation is an essential requirement of all of Plaintiffs’ claims. *See, e.g.,*
18 *McVicar v. Goodman Global, Inc.*, 1 F. Supp. 3d 1044, 1051-52 (C.D. Cal. 2014)
19 (UCL); *Binning v. Louisville Ladder, Inc.*, 2014 WL 4249667, at *7 (E.D. Cal.
20 Aug. 27, 2014) (implied warranty claims); *Arevalo v. Bank of Am. Corp.*, 850 F.
21 Supp. 2d 1008, 1021 (N.D. Cal. 2011) (CLRA); *Uzyel v. Kadisha*, 188 Cal. App.
22 4th 866, 892, 116 Cal. Rptr. 3d 244, 264 (2010) (unjust enrichment).

23 Here, even if this Court were to accept, as evidence, Plaintiffs’ bald
24 allegation of a “design flaw in the clutch master cylinder” which allows “debris” to
25 “contaminate” “internal and external seals,” summary judgment should still be
26 entered in favor of FCA US because the evidence proves that this purported
27 “defect” was not what caused Plaintiffs’ claimed injury.

1 Plaintiffs' vehicles were examined by the dealerships at the time they were
2 brought in for repairs. The dealership technicians examining Victorino's vehicle
3 concluded that the clutch in his vehicle was simply "**worn out,**" and that the clutch,
4 slave cylinder, and flywheel were "**all overheated and warped.**" (UF, No. 7). This
5 was found to be "**normal wear and tear.**" (UF, Nos. 7-8). The dealership did not
6 find any evidence of a failure due to a "defect" of any type, let alone a "design
7 flaw" in the clutch master cylinder which caused "contamination" of "internal and
8 external seals." Indeed, the dealership identified no problems with the clutch
9 master cylinder in Victorino's vehicle during this (or any other) service visit. (UF,
10 Nos. 9-10, 14-16). Furthermore, Victorino effectively asserted that the repair was
11 not necessitated by such a defect (a "design flaw" which caused "contamination" of
12 "internal and external seals") when he took the position that he was entitled to
13 reimbursement under a program that provided coverage only for clutch master
14 cylinder and reservoir hose components that failed due to leaching plasticizer.
15 (UF, No. 13).

16 Likewise, the dealership technicians examining Tavitian's vehicle did not
17 find any evidence that the issues with his vehicle were caused by a "design flaw" in
18 the clutch master cylinder which caused "contamination" of "internal and external
19 seals." While the first repair to Tavitian's vehicle did involve replacement of the
20 clutch master cylinder, there is no evidence the repair was needed due to **any**
21 defect. And, by making a claim that the repair should be covered under FCA US's
22 extended warranty, Tavitian effectively took the position that the repair was due to
23 leaching plasticizer in a reservoir hose, an issue that, as he has made clear, is
24 unrelated to his claims here. (UF, No. 25; Comp., ¶¶ 4, 65). Moreover, the
25 evidence proves that no defect of any type was involved in the second repair, as the
26 diagnosis was that the clutch system had simply "**worn out,**" which was likely due
27 to Tavitian's driving habits that had left observable "**signs of ... overheating.**"
28 (UF, Nos. 33, 34).

1 Plaintiffs cannot possibly disprove the findings of the dealerships which
2 diagnosed the cause of the symptoms displayed in their vehicles because, as they
3 admit, they do not have the components that were diagnosed as having “worn out.”
4 (UF, Nos. 18, 37). Because Plaintiffs cannot link the failed components in their
5 vehicles to any defect (versus everyday wear and tear), they certainly cannot show
6 that the repair costs they incurred were caused by a defect. Because Plaintiffs have
7 no evidence that could support the critical causation element of their claims,
8 FCA US’s motion for summary judgment should be granted.

9 **IV. CONCLUSION**

10 For the reasons outlined herein, Defendant FCA US LLC respectfully
11 requests that this Court enter summary judgment in its favor on all of the claims
12 asserted by Plaintiffs Carlos Victorino and Adam Tavitian in their Complaint, and
13 grant it such further relief as may be just and proper.
